# GENERAL INFORMATION

This catalogue consists of illustrations and descriptions of the mechanical and body parts for the “ D ” models, 1970.

a) Arrangement. — The binding is of a type which allows easy replacement of the pages, when any considerable changes are made.

b) Classification and names. — The parts are classified by units or groupes. In the illustration, they are grouped in the order in which they are assembled, with a mark number shown for each part. In the text, on the opposite page, they are arranged in the order of the mark numbers (1st column).

The number of each part used in a unit or group is shown in the “ K ” column.

Dimensions and particulars are given in the text for identification only and are subject to modification as may become necessary.

Dimensions are quoted in millimetres.

For explanation of particulars given in the text, please refer to the “table of symbols”.

c) Reading the catalogue. — Consult the table of symbols in order to identify the car type. Consult the table of contents which refers to the text and illustration. Look for the part in the illustration on which the mark number is shown, look up this number on the text page and read the corresponding part number.

For parts not illustrated, look for the name and number directly in the text.

If it should happen that in some rare case, you are not certain of being able to write out the order correctly, it is advisable to give us the chassis and engine numbers.

To make it easier to find a part the number of which you know, we have compiled an “ Index ” that shows you the page on which the part concerned appears.

d) Recommendation. — You should take great care to make out your order and respect:

- capital letters as prefix and as suffix,
- hyphens separating the two numbers.

The omission of one of these items, when composing a number, completely alters the meaning and you would thus risk making an error in writing out the number of a part and being sent a part entirely different from the one required.

e) Prices and conditions of sale. — Prices are given in a separate list; they are subject to alteration without notice.

The conditions of sale are shown at the head of our price lists (spare parts and standard exchanges).

# TABLE OF CONTENTS (cont.)

## ENGINE:

|                               |       |
|-------------------------------|-------|
| Accelerator control .....     | 64-84 |
| Camshaft .....                | 60-63 |
| Connecting rods .....         | 56-59 |
| Engine sump .....             | 2-7   |
| Cylinder barrels .....        | 2-3   |
| Cylinder head and cover ..... | 8-13  |
| Rockers .....                 | 14-17 |
| Distributor. ....             | 60-63 |
| Air filter .....              | 40-49 |
| Engine complete. ....         | 1     |
| Pistons .....                 | 56-59 |
| Water pump .....              | 90-95 |
| Oil pump and oil cooler ..... | 84-89 |
| Valves .....                  | 14-17 |
| Manifolds .....               | 26-39 |
| Fan .....                     | 90-95 |
| Crankshaft .....              | 56-59 |

## GEARBOX:

|                          |         |
|--------------------------|---------|
| Gearbox complete .....   | 100-103 |
| Gearbox housing .....    | 104-113 |
| Gearbox cover .....      | 114-125 |
| Differential .....       | 142-145 |
| Forks and spindles ..... | 114-125 |
| Speedometer pinion. .... | 130-141 |
| Pinions and shafts. .... | 126-141 |
| Gear selector .....      | 174-177 |
| Speedometer wheel. ....  | 104-113 |

## INJECTION SYSTEM:

|                                     |       |
|-------------------------------------|-------|
| Electronic control .....            | 20-21 |
| Injection device .....              | 22-25 |
| Injectors-Pressure regulators. .... | 18-19 |

## PEDAL GEAR .....

220-227

## PIPING:

|                                               |         |
|-----------------------------------------------|---------|
| Clutch control .....                          | 156-163 |
| Gearbox control. ....                         | 170-173 |
| Steering .....                                | 318-319 |
| Brake .....                                   | 320-329 |
| Overflow (suspension) – Piping securing. .... | 330-349 |
| Suspension .....                              | 316-317 |

## STEERING:

|                                  |         |
|----------------------------------|---------|
| Anti-theft device. ....          | 280-281 |
| Centraliser .....                | 250-259 |
| Levers and rods .....            | 274-279 |
| Rack and pinion .....            | 260-269 |
| Relay housings. ....             | 274-279 |
| Steering piping .....            | 318-319 |
| Hydraulic part .....             | 270-273 |
| Steering wheel and bracket ..... | 250-259 |

## SUSPENSION:

|                                            |         |
|--------------------------------------------|---------|
| Front damper. ....                         | 302-305 |
| Rear damper .....                          | 306-309 |
| Suspension piping .....                    | 316-317 |
| Pressure regulator – Accumulator .....     | 292-295 |
| Corrector front, and rear .....            | 310-315 |
| Front cylinder and suspension sphere. .... | 302-305 |
| Rear cylinder and suspension sphere. ....  | 306-309 |
| H.P. pump .....                            | 282-291 |
| Réservoir .....                            | 300-301 |
| Safety valve .....                         | 296-297 |
| Priority valve .....                       | 298-299 |

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 2 | 40 x 80 x 18. | Roulement à rouleaux.           | Rollenlager.                                | Roller bearing.                   |
|    |
